How do I get the Freading App on the Kindle Fire?

Slideme is the easiest way to get the Freading® app for your Kindle Fire.

Make sure you have enabled "Download from unknown sources" in the device settings. This is different depending on the model of Kindle Fire. In general this is done by:

- Opening your notifications bar.
- Select "More" to go to your device's settings.
- Select "Device."
- Slide bar to ON for "Allow Installation of Applications From Unknown Sources".

You will now be able to download the Freading® app.

- Go to http://m.slideme.org and type "Freading" in the search box
- Click on the "Freading" icon and you will be led to a page where you can download the app.
- Click the button that reads "Download" located right above the app's description.
- The application will download, but will not install automatically. Once the file downloads, look for a notification indicating there has been a download. Typically this will display in the notification bar at the top of the screen, and you will be able to drag down from the top to view the recent downloads. If you do not see it here, please look under "My Downloads" within your browser. You will be able to find this within your browser's menu.
- Tap the download, and this will begin the installation process.
- Once installed, you will need to authenticate your app with an Adobe ID. You will be able to do this by clicking the menu button within the app and selecting "My Account."

You are now ready to use the app. Enjoy!

How do I get the Freading App on the Kindle Fire?

GetJar is another way to get the Freading App on the Kindle Fire.

To use GetJar, make sure you have set the browser to optimize for mobile view.

To do this on the NEW Kindle Fires
- Open the browser
- Tap the menu button at the bottom
- Select Settings, and set "Requested website view" to Mobile
- Then re-load the GetJar website, and search for "Freading".

When you try to download it, check the status bar to see if there has been a download. If there has, tap it, and install.

At this point, you should have the GetJar app installed. Open this, and search again for "Freading". This should allow you to download the app. Make sure to check the status bar for a download.

***Note:** The application will download, but will not install automatically. Once the file downloads, look for a notification indicating there has been a download. Typically this will display in the notification bar at the top of the screen, and you will be able to drag down from the top to view the recent downloads. Tap the download, and this will begin the installation process.

Once installed, you will be ready to use the Freading® app.
